Higher risk

movements in the markets.

The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily, or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as class 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

**Be aware of currency risk. If you buy this product in a currency different than USD, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

#### Performance Scenarios

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

Recommended holding period: 1 year Example Investment: USD 10 000 Scenarios		If you exit after 1 year
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.	
<b>Stress scenario</b>	<b>What might you get back after costs</b>	USD 1565.21
	Average return each year	-84.35%
<b>Unfavourable scenario</b>	<b>What might you get back after costs</b>	USD 8380.07
	Average return each year	-16.20%
<b>Moderate scenario</b>	<b>What might you get back after costs</b>	USD 10912.55
	Average return each year	9.13%
<b>Favourable scenario</b>	<b>What might you get back after costs</b>	USD 14209.63
	Average return each year	42.10%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor and any on exchange bid/offer spreads. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if Leverage Shares plc is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. If we fail to make a payment when due, the trustee (Apex Corporate Trustees (UK) Limited) can enforce the security over the Collateral Assets. Once the trustee has enforced the security it can then sell the Collateral Assets and use of the proceeds of this sale to pay the amount owed to you under the ETP Securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETP Securities and you may lose some of all of your investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- **USD 10 000** is invested.

Investment USD 10 000	If you exit after 1 year
<b>Total costs</b>	<b>USD 77</b>
Annual cost impact (*)	0.77%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.90% before costs and 9.13% after costs.

#### Composition of costs
